About Me

Hello. I'm a self-taught software developer who enjoys using computers to create things I like, or something I cannot find for myself. Whether I am by myself or with a group of people, I am quite adaptable to situations or challenges thrown at me. I enjoy the continuous struggle of learning, despite wanting to bash my head on the desk at times.

EXPERIENCE

10,000 Game
Video Demo

- A JavaScript project that allows one player to play the game 10,000, or Farkle!
- Random combinations of dice are generated, and the player can click based off provided scoring rules

Google Maps API Tour
Video Demo

- A web application iterating through some of my favorite places in the La Jolla area around UCSD.
- Click on a marker to begin the cycle iterating through each marker with a window providing some basic information

Nickels and Dimes Timer
Video Demo

- A web application designed as a timer to log sets of the exercise "Nickels and Dimes," coined by David Goggins.
- You can set your own time limit for one set of nickels and dimes, with a loop restarting the set time, and adding one to the set number.

Bookkeeper
Video Demo

- An application that allows one to log book titles, the author, price, and subject.
- Open the modal to provide information that is generated to a table

EDUCATION

Bonita High School, La Verne, CA

Cumulative Weighted GPA: 4.43

Cumulative Non-Weighted GPA: 3.88

University of California: San Diego, La Jolla, CA

Major: Cognitive Science

GPA: 3.825
